2. Why study this course, including course aims and objectives

The Fashion Design programme encompasses the inspirational, and experimentational elements of the fashion creative industries and beyond. With a focus on enhancing and curating individual creative processes, and polished yet contemporary creative outcomes via multiple visual expression and 3D techniques.

We focus on evolving Fashion collections conception and technical solutions. With your projects seeking to drive meaningful change in the discipline through informed, researched, and detailed proposals combined with an intuitive vision, and solid research and design skills embedded in a creative strategy.

Through an in-depth immersion into industry practice, both in terms of simulated scenarios and real projects, you can expect to gain practical skills in an environment where you will have the opportunity to plan and organise contemporary fashion practice-based content, as well as explore the fashion network industry on a global scale.

When considering the industry today, practical skills, and the links to elements such as sustainability are reflected upon heavily. We introduce you to the journey of an informed circular economy, and ethical practices while conceiving, planning, designing, and producing a Fashion collection.

Fashion Creatives are also often immersed in the environment as freelance entrepreneurs, and we heavily enforce and inform best practices on being a part of the vibrant creative industry and its realm.

The creative outputs gained from this course, will be generated using both physical and digital means.

An extensive research methodology for each output will also be supported by rationale.

The importance of storytelling in fashion is further established through in-depth research methodology, aimed to create identity and relevant narratives.
The form of design creation and development is also enforced to a professional standard.

Not only does this course look at collection and prototypes creation, it enhances the overall creative journey and investigation of trends, using visual and oral communication to inform decisions and outcomes.

You will progress by undertaking a series of creative and commercial projects, which will contribute to the execution of a professional portfolio, product range and catwalk proposition, which represents your individual creative style.

The development of the course leads you to learning how to manage self-initiated creative briefs, delivered and pursued from both a practical and academic discipline.

The course allows for an opportunity for you to look into the future of the fashion industry, both online and offline. It allows you interrogating and challenging the status quo whilst giving you the unique opportunity to navigate, and experiment with emerging digital media and technologies, using a variety of platforms, and considering mixed reality elements.

The course will provide you with an insight into the nature of entrepreneurship and innovation in both theory and practice, with specific attention to contemporary and upcoming digital outcomes and markets.

You will also be significantly engaged with experienced professionals and practitioners through industry projects.

The course encourages you to examine the past and challenge the present, to have inventive, assertive ideas that question contemporary agendas. Giving you the skills, opportunities – and above all, the freedom – to put those ideas into practice.

As part of this course, you will explore diversity, social responsibility, and sustainability. An emphasis on how you may apply this critical thinking across these important themes to your practice is crucial.

Through teaching, specialist research, and collaborative work, we encourage thinking differently. By using the fashion industry as a lens to examine the history and work towards building a more sustainable and ethical environment in the future.

This course is part of the Fashion Design study pathways. With fashion design as the core subject, participants specialise in the chosen area of interest (Womenswear, Menswear, Accessories and Marketing), completing the course with a distinct professional profile.

This course is also available as a BA (Hons) four-year course (including Sandwich Year placement).

The course is suitable for creative and practical students with entrepreneurial acumen.

You must have an interest in Fashion design, Product Development and Artistic Direction.

Employment opportunities
The aim of the undergraduate course is to enable you to gain employability, professional and skills enhancement, as well as offering you opportunities for progression onto postgraduate degrees. In response to the constantly evolving and expanding fashion industry, market research has shown that industry requires professionals who are ready to meet your demands.

The uptake of careers post-qualification is on a global scale, adding to the already international network of alumni. Istituto Marangoni works closely with employers and academic staff to promote and support work placement opportunities and communicate job vacancies for Istituto Marangoni students through recruitment days organised at the school.

Prospective careers:

- Fashion Designer
- Accessory Designer
- Textile Designer
- Collection director
- Artistic Director
- Image consultant
- Creative consultant
- Collection consultant

- Product Manager
- By-product Coordinator
- Personal shopper
- Trend forecaster
- Visual merchandiser

February intake:
Term 1: April
Term 2: June
Term 3: August

Sandwich year (optional)
The Sandwich Year is a period of work placement experience in the fashion industry that you will undertake during the third year of your studies. A work placement constitutes an invaluable opportunity to learn and gain insights into how the industry is structured and how it operates, to put into practice the theories and knowledge acquired during your studies and to further enhance the practical skills learned during the first two years at Istituto Marangoni Paris.

Under the close supervision and guidance of the School as well as of the company where you will be undertaking the placement, during the Sandwich Year you are required to complete a 36-week industry placement relevant to the learning outcomes of your programme and relatable to your career objectives and professional development.

The skills learned will give you practical knowledge of the nature of the business, its functions, and operations. Students will also acquire and/or strengthen those transferable skills that have become a fundamental requisite for boosting your employability and enhancing your professionalism.

The School ensures that you have access to all academic / regulatory information that you should familiarise with at the start of each academic year. Those include (but not limited to):

- Yearly re-enrolment and payment of enrolment fee
- Active academic engagement (at least 80% attendance (termly))
- Timely notification of absences

The Sandwich year will be graded as a Pass/Fail and students who complete the 120 credits for the Sandwich year will receive a Certificate of Completion for the Placement, which is credit bearing, upon completion of their degree or when leaving with an exit award.

Units

The course is composed of a number of units that each have a credit value. On successfully passing each of these units, you will gain credits that count towards the total needed for your degree.

One credit equates to 10 notional hours, which is the average time a student will take to achieve the specified learning outcomes. So, if a unit is worth 10 credits, then students would expect to spend 100 hours studying. These will not all be 'taught' hours. You will receive guidance and instruction through lectures, seminars, etc., but you will also need to engage in self-study. A percentage breakdown of teaching contact hours and self-study required on this course is indicated in Section 6.

On an undergraduate degree course provided by Istituto Marangoni Paris, students are expected to study 120 credit per level (or year) with no more than 60 credits per term.

6. Learning and teaching strategy/ assessment methods (non-regulatory)

This is a guide to the academic opportunities available to help you achieve the overall aims and objectives of the course and the intended learning outcomes in Section 5. It is also a guide to the assessment methods used to test your achievement of the intended learning outcomes. In order to meet the full intended learning outcomes of the course, you will be expected to study independently, participate in class discussions, ask for support in academic skills if required and engage with your personal tutors.

The Teaching and Learning Strategy is central to the overall objectives of the programme.

The emphasis is placed on achieving an appropriate balance between deepening your academic knowledge and business acumen and building creative, practical, and transferable skills.
This Strategy places the "you" at the centre of the teaching and learning environment.
Through interactive, experiential teaching and learning activities, we aim to support you to develop into a self-directed, autonomous learner who has responsibility for your own learning process.

Istituto Marangoni Paris Teaching and Learning Strategy is designed to reflect the changing skills required within the fashion industry with a philosophy of being interdisciplinary. The aim is to provide you with a broad range of practical and theoretical knowledge and skills specific to Fashion Design studies and their areas of specialisation, which are also applicable to the wider skills required in the workplace.

At Istituto Marangoni we aim to deliver a personalised student experience. With over 100 nationalities within the cohorts, our classes have a cultural richness which offers a global perspective within every session.

The programmes are predominantly created with an industrial spin, simulating a real-life experience curated by our team, which includes top of the line industry professionals.

Our classes are delivered across 2.5-hour sessions comprising of a diversity of lectures, seminars, labs and tutorials; which are tailor made by our tutors in order to integrate both theoretical and practical deliverables. Each student has 15 hours of delivered sessions per week. At the halfway mark of each

term, we provide formative feedback to every student giving them personalised suggestions, and critical support in order to develop their work further.

- Lectures are used to communicate key theories and practices of the subject
- Practice based workshops are key to communicate, demonstrate and acquire tools and techniques fluency, in physical and digital 3D expression
- Seminar groups are used to discuss current affairs and industrial issues, often via case studies.
- Labs are used for development of physical work through synergic confluence of 2D and 3D research recreating Industry practice

At Marangoni we pride ourselves on inclusive and interactive teaching. All classrooms hold no more than 25 students, in order to offer more one-to-one contact time between you and your tutors.
This allows for us to cater to SEN students, and each class's unique needs. It also allows for an interactive classroom, encouraging you to share your opinions, and develop peer to peer learning skills.

The course is designed so that you will study under direction of your lecturers at the beginning of your degree and gradually move towards greater independence as you progress through the terms towards your final projects.

Fashion has traditionally been taught in lab environments, while theory-based degrees have been taught through formal lectures.
Your programme combines the best of both traditions, giving you a good combination of lecture-based teaching with tutorial support, and lab-based teaching with individual and group critiques and activities. It also combines the best in terms of the forms that your work will take, spanning project-based learning, essays, fashion industry practice, presentations, and hands-on experiential learning such as physical (fittings) and digital (Clo3D) still/moving prototypes and outfits creation.

When considering the digital learning environment, you not only have access to cutting edge resources such as industry standards CAD software but a versatile library of equipment.
All teaching resources and materials are available for use via the virtual learning environment.

Industry projects, work experience, tutors who are practising professionals and guest lecturers give you valuable links with the profession and ensure that your learning is constantly updated with regard to industry currency.

At the beginning of each Unit you will be given a Unit Handbook and other materials (such as Projects/Assessment Briefs) by your lecturer(s). These set out everything you need to know about your learning on that unit, for example: what form learning and teaching will take, the unit content, the aims and learning outcomes for the unit, and the ways in which you will be assessed, deadlines for submission of work and how the unit will be scheduled in terms of how much time you will spend in different kinds of activities each week (for example: lab-based work, lectures, workshops, digital, field trips). It will also contain information about what kind of work you are asked to submit for assessment (for instance projects, essays, presentations, reflective self-evaluations, learning journals, physical research and/or design books, portfolios and 3D developments) and it will tell you the weightings of those assessments (for instance: 90% for a Portfolio and 10% for an Oral Presentation).

We highly recommend that you complete internships/work placements in the industry in addition to your studies. Work placements enable you to enrich your understanding of the industry, consolidate what you have learned and make valuable networking within the profession. Some students are

offered jobs once your graduate with the companies that your have worked with on work placements. Work placements may be as short as a few hours and as long as several months during the summer break.

Industry Work Placement Sandwich Year – gives you the opportunity to develop the appropriate skill sets for the workplace relevant to your course and to enhance your prospects of future employment in the sector. You are supported by the Career Services Manager and an allocated Academic tutor during this period. You are required to keep a reflective journal, which forms part of the assessment, once on placement.

The practical skills you gain across the course is a key focus point. We aim to have you develop a great cultural awareness, skills and craftsmanship to successfully enter the global labour market.

The heart of central Paris, a true fashion capital, offers a plethora of field visits and trips that are offered to our classes.

Course management and teaching staff
The Course is run by a Programme Leader, supported by Unit Leaders, teaching is delivered by specialist tutors and overseen by a Director of Education.

All of our academics are continuously involved in industry and market research and some in scholarly activity and practical activities, as well as being heavily involved within the industry in their selected areas of expertise. The course truly relies on our team, being active in the environment they teach and deliver in, to create a greater more current experience for the students.

The team's areas of academic and professional interest and experience, directly coincide and support our programme. As such there is a direct correlation that the curriculum is informed by this and updated accordingly.

Visiting Lecturers and Guest Speakers are an integral part of the course and make individual interventions on specific parts of its delivery. They deliver on a level of contemporary information and content that is directly applicable to both the programme deliverables and careers.

Assessment strategy and methods

Assessment is important to your learning. It is a positive element of your education. We use assessment to encourage you to do as well as you can, and you can use it for the same purpose.

While each unit on your programme has learning outcomes, assessment is used to test that you have achieved those learning outcomes. This means that assessment tasks are appropriate for the unit in question. Assessment on your programme is both practical and theoretical, to ensure that you become a reflective practitioner of your art, requiring you both to create fashion outcomes and to consider your role and function in society, and your relationship to the individual.

You will be expected to complete assessments by yourself and as part of group work. You will be asked to document your work and to write self-evaluations. When you are involved in group work you will be asked to keep a log and to evaluate your peers.

You will have at least one formative assessment within the first six weeks of the start of each unit and this helps support you with your studies and highlights any further support that may be needed from the student support officer or the unit leader. It does not contribute to the award mark.

Summative assessment measures your achievement against the course Learning Outcomes and provides an evaluation of your progress and learning during an entire unit, generating a unit mark and constructive feedback. It also confirms the conditions for referral and retake where applicable. Examples of summative assessment include written assignments (essays, reports, case studies), practical coursework (Collection Portfolios, Research/Sketch/Fabric Books, 2/3D projects and Prototypes production) and oral and visual presentations using a variety of media, both physical and digital (Prototypes and Collection fittings, Collection Coordination).

You are strongly encouraged to seek as much feedback as possible about your progress on your units from your lecturers. Your lecturers will write about your performance and progress on your units (feedback) and you will also write about what you are advised to do in the future (feed-forward). This information is very valuable as it will support you in understanding how well you did in one unit, and what you should concentrate on to do as well as possible in future units.

Please note that IMP may need to keep your work for various reasons, including audits, good practice examples, validations and for External Examiners to review. You are advised to keep copies of your work wherever possible and to contact the Course Leader for information about collecting work.

Ethical approval of research

In accordance with the Istituto Marangoni Research Ethics Policy, all students are required to submit their application for ethical approval at the same time as they submit their initial research proposal, using the School's Research Ethical Approval Form. The application will first be reviewed by their research supervisor in accordance with the ethical approval framework who will either approve it (low risk) and send it to the Research Ethical Committee for final approval or refer it to the Research Ethics Committee for their review and approval (medium/high risk). Proposals requiring ethical review and approval by the Research Ethics Committee include but are not limited to those involving human participants or vulnerable groups, those involving highly sensitive topics and sensitive or restrictive data or materials. You are advised to refer to the School's Research Ethics Handbook as you develop your research proposals to ensure that you address all potential ethical implications that may arise from their research by putting appropriate measures in place.

7. Relationship to other courses

Some courses share units or have other connections to other courses. This is a guide to whether this is applicable for your course.

The cross disciplinary approach of the Course is reflected in the following units:

Level 4 History of Art and Fashion
Level 5 Fashion Art & Cultural Context

Level 6 Final Dissertation

The long units support the core subjects' units taught, enabling you to gain knowledge about Fashion, Art and Culture.

These units are underpinned by academic methods of teaching and assessment outcomes; from research methodologies to essay writing and at level 6, the research proposal and writing of a final dissertation.

These units are taught across all Fashion Styling and Design courses and your subsequent pathways for:

- BA (Hons) Fashion Styling and Creative Direction
- BA (Hons) Fashion Styling and Visual Merchandising
- BA (Hons) Fashion Design
- BA (Hons) Fashion Design and Womenswear
- BA (Hons) Fashion Design and Menswear
- BA (Hons) Fashion Design and Marketing
- BA (Hons) Fashion Design and Accessories

In addition to this, the first Unit of Level 5 unit Fashion Brand Exploration contains an Interdisciplinary Project involving a collaboration between Fashion Design, Fashion Business and Fashion Styling and Creative Direction students aimed to foster cross disciplinary partnerships on an Industry simulated scenario.

Furthermore, and due to the specific nature of the delivered knowledge, a collaborative atmosphere between Fashion Design, Fashion Styling and Fashion Business students is encouraged, aimed to foster the typical contemporary Industry partnerships in a simulated scenario.

8. Student support

Istituto Marangoni Paris provides a range of student support mechanisms which include (but not limited to):

- **Admissions:** the department provides information about all the programme and study opportunities at Istituto Marangoni, supports and assists applicants throughout all stages of admission from initial enquiry, application to enrolment.

- **Academic and Student Services:** the aim is to support and enhance your experience allowing individual growth and success. The department provides pastoral, academic, social and wellbeing support and guidance as well as advice regarding timetables, deadlines, and School regulations.

- **Library:** the library service aims to deliver a high quality engaging and supportive service for you in support of an outstanding, inspiring, diverse, innovative, and creative educational experience. The service intends to inspire you to discover more about your subjects and other

relevant disciplines as well as provide information and materials to support the syllabi for all subjects taught in the school.

- **Careers Service**: the department supports students and alumni, offering guidance on all aspects of your career journey, providing practical advice, and helping students connect with industry.

- **SEN support:** the School aims to provide equal opportunities for all its students. Tutor support is intended to remove any barriers that may prevent you from fulfilling your potential and the School is always ready to respond positively to your needs. Any students identified for learning support have their needs addressed by Academic and Student Services jointly with the Programme Leaders team who assist them in areas such as time management, identifying and dealing with learning difficulties and helping to prepare their personal Learning Plan. The arrangements are being kept under review on an annual basis.

10. Opportunities for personal development planning

When accessing professional development within your programme, you are delivered an array of content pointing them in the direction of reflecting upon your personal practice. This is delivered through both PPD and PDP.
PPD - Personal and Professional Development is about creating and planning a career trajectory whereas, PDP - Personal Development Planning allows you the opportunity to be reflective, during planning and evaluating processes towards your goals.
They learn the understanding and application of critical reflection during and after all learning processes and activities.
Through the use of a variety of models, you are able to gather evidence and underpin key components to your learning practice encouraged through storytelling, and multimedia forms of expression.

In addition to the above, cross departmental support is available to you, such as:
SEN support:
The School aims to provide equal opportunities for all its students. Tutor support is intended to remove any barriers that may prevent syou from fulfilling their potential and the School is always ready to respond positively to their needs. Any students identified for learning support have their needs addressed by Academic and Student Services jointly with the Programme Leaders team who assist them in areas such as time management, identifying and dealing with learning difficulties and helping to prepare their personal Learning Plan. The arrangements are being kept under review on annual basis.

Career support:
The purpose of the Istituto Marangoni Career service is to bridge the gap between course completion and entering the world of work. Monitoring, guidance, and counselling activities are organised throughout the academic year. The careers service organises various activities including seminars and round table discussions with fashion professionals, HR managers and head-hunter agencies on specific topics such as future career paths, personal research methods and job profiles. Individual meetings are also arranged to assist with CV preparation, revise portfolios and encourage you to talk about your career goals and expectations.

11. Admissions Information

Entry requirements

- Copy of a high-school diploma or school certificates
- Completion of an entry test
- Non-native English speakers are required to provide an acceptable proof of their English Language ability. The English Language test score should be at least B2 on the CEFR level (e.g. IELTS Academic with 6.0 overall, no less than 5.5 for each element)
- Students who complete the Certificate of Achievement: Foundation in Fashion at Istituto Marangoni Paris will have guaranteed progression to BA (Hons) Fashion Design, provided they have the required L4 English entry requirement.

12. Visas and immigration

Students holding a visa to study in France should familiarise themselves with the conditions and details of their visa.

Students must be aware of the requirements of their visa, including the limitations on your working rights and permitted work. For any further questions, you should contact the admission office directly using an email address included in the Student Handbook.

In addition, after obtaining the first visa, the school librarian is supporting existing students in any further needed information, visa prolongation and renewal and communication with the local visa offices.

13. Assessment and progression regulations

You will be assessed on how well you are achieving the intended leaning outcomes at different stages throughout your time of study at Istituto Marangoni Paris.

In order to continue with your studies, there are minimum requirements to be met in order to progress to the next level of your course. The current progression regulations are published within the Academic Regulations on our website at the link below. These are subject to review and amendment each year.

We will let you know if there are any major changes to the regulations that may affect you.
regents.ac.uk/about/governance/academic-governance/academic-regulations

You will be provided with guidelines on what you need to achieve in each assessment to ensure you receive a good mark. A generic description of each grade is available at:
regents.ac.uk/about/regents-teaching-exchange/learning-teaching/assessment-framework

14. Award criteria

To complete the programme, you will need to achieve a total of 360 credits for an undergraduate degree, 120 credits per level/ year.

Note: 120 credits for the Sandwich Year does not count towards the 360 credits required to achieve the BA (Hons) Fashion Design.

15. Methods for evaluating and improving the quality and standards of teaching and learning

The academic staff is being supported by receiving offers to further develop their skills and acquire academic qualifications as:

·   LTA, Learning Teaching Assessment
·   PgCert

Istituto Marangoni Paris also financially supports, partly or fully, academics costs to attend conferences and training that can benefit both the staff and the institution.
The Director of Education, with the support of the QA and HR teams, selects on a yearly basis the academic staff to whom professional development will be offered. This selection is being made based on available budget and development needs in order to progress staff and be able to deliver teaching quality.

Staff members are invited to an array of regular training sessions facilitated by DOE, PL and ULs, covering tutor induction at the beginning of the Academic Year and stretching through formal faculty meetings several times during the academic year and specific support on assessment activities.

Continuous monitoring and evaluation of programmes is an essential part of Istituto Marangoni Paris's quality assurance framework enabling discussion and consideration regarding potential enhancement of learning opportunities within specific programmes, resulting in a higher quality student academic experience. The academic team is encouraged to evaluate the programmes and propose content, teaching delivery or assessment related changes for reasons such as quality improvement, in response to feedback from students, academic faculty or subject External Examiners, to ensure currency of programmes, annual monitoring and data outcomes and/or alignment with any regulatory body requirements or changes.

Below are examples of continuous programme management and quality arrangements:

- **Course validation or revalidation:** the programme approval is based on a process of internal and external peer review and ensures alignment against all relevant UK external reference points as well as internal and external policies and procedures.

- **Annual programme / unit modifications**: the academic team is encouraged to evaluate the programmes and propose content, teaching delivery or assessment related changes for reasons such as quality improvement in response to feedback from students, tutors or subject

External Examiners to ensure currency of programmes, annual monitoring and data outcomes and/or alignment with any regulatory body requirements or changes.

● **Programme Continuous Improvement Plans:** the process provides an important source of information for programme teams on the operation of the programmes as these documents provide a complete record of enrolment and Assessment Board related information, progress of actions, good practice identified, student and External Examiner feedback, complaints overview etc.

● **Unit performance reports:** the purpose of those reports is to continue and enhance the quality of units and act upon any concerns in a timely manner.

● **Student engagement and feedback:** student participation in quality assurance and enhancement processes helps to improve the educational experience of students, benefiting the wider student body, the Higher Education sector as well as engagement with collaborative partners within industry. Student engagement contributes to quality assurance and enhancement processes by effectively capturing the student voice, acting upon student feedback, student academic engagement as well as their engagement with the School. Students have an opportunity to provide ongoing information and formal feedback as part of their studies. The ways of providing feedback include (but not limited to): student voice and NPS surveys, industry engagement, monthly events, Student Representative meetings and formal Committees and academic related activities.
