

istitutomarangoni

**ONE-YEAR COURSE
DIGITAL FINE ART INTENSIVE**

Version 01

Brief descriptive summary

Over the past 80 years Istituto Marangoni has grown and developed alongside the thriving Italian fashion and design industry. Through an exciting curriculum aimed to develop practical, creative, and business and management skills which are subject specific, and relevant to the international fashion industry, Istituto Marangoni undergraduate courses prepare students with the necessary knowledge and know-how in order to enter a professional career in the fields of Fashion Design, Accessories and Footwear Design, Fashion Styling, Fashion Business and Communication, Fashion Promotion, Brand Management, Digital Design and Interior Design.

General Information**1. Certification attained**

Istituto Marangoni certificate

Programme Information**2. Educational Aims and Course Aims****School Education Aims:**

- to develop flexible approaches to programme delivery and student support which reflect the needs and expectations of our students;
- to provide a supportive and inclusive learning environment which will enable success for all learners;
- to encourage the development of students' intellectual and imaginative powers, creativity, independence, critical self-awareness, imagination and skills that will enhance global employment opportunities on graduation in all programmes;
- to establish a culture of constant improvement in learning, teaching and assessment that is anticipatory, enabling, supportive, rewarding and fully aligned with the Institutions vision and strategic objectives;
- to provide a learning experience that is informed by research, scholarship, reflective practice and engagement with fashion and design industry and the professions.

Programme Aims:

Digital Fine Art Intensive trains creative practitioners of the future, encouraging the investigation of a broad range of experimental art practices. Constantly merging art production and art experience the programme begins with the understanding of visual communication fundamentals, where participants start to develop a personal language. Then students will learn how to discipline their creativity to fit from a technical point of view, what each medium requires and offers. Through multimedia languages, students will understand the various aspects of digital art production and work according to the correct processes in moving images, sound and 3D Design. In parallel participants will explore the art system through the analysis of its players, contemporary visual trends and international art market. A special focus will be dedicated to exhibition planning and contemporary museology, allowing students to design the artwork's experience questioning the role of the viewer and rethinking immersivity and interaction according with the digital revolution.

And all this in environment and a city where you breathe art and fashion on a daily basis.

3. Course Learning Outcomes**Educational Outcomes:**

On successful completion of their course of study students will be able to:

- apply skills of critical analysis to real world situations within a defined range of contexts;
- demonstrate a high degree of professionalism characterised by initiative, creativity, motivation and self management;
- express ideas effectively and communicate information appropriately and accurately using a range of media including ICT;
- develop working relationships using teamwork and leadership skills, recognising and respecting different perspectives;
- manage their professional development reflecting on progress and taking appropriate action;
- find, evaluate, synthesise and use information from a variety of sources;
- articulate an awareness of the social and community contexts within their disciplinary field.

Final Award Learning Outcomes

On successful completion of their course of study students will be able to:

- develop an independent and individually driven high quality creative practice that engages in or challenges the contemporary field of Digital Fine Art.
- demonstrate ability to apply a variety of approaches to the visual communication design process while developing a consistent group of digital artworks;
- demonstrate ability to apply a variety of approaches to the curatorial practice while developing a consistent exhibition or presentation project;
- demonstrate an in-depth understanding of different visual languages and techniques;
- differentiate the curatorial approach according to the viewer experience and interaction;

- appraise and apply research from a variety of sources;
- demonstrate the ability to interact with different player inside the Art System and Contemporary Market.

4. Teaching/Learning and Assessment Strategy

Curriculum:

The students will start by developing their first approach to the fundamentals of visual communication analysing several case studies and learning how to transform a concept into an artwork through specific exercises. Furthermore, they will confront themselves with the specificity of each artistic medium (drawing, digital illustration, photography, 3d design, moving images and sound) and the technical skills required to work with it in a proper and consistent way. The combination between this technical part and the conceptual one aims to train a complete and independent professional figure, aware of the wide range of possibilities offered by multimedia languages.

The notions provided during the programme will enable students to also gain a broad understanding of the art world through its history, evolution, industry and players. They will learn to plan an exhibition or event developing the curatorial concept and structuring the project also from a managerial point of view. Questioning artistic and curatorial trends from social, economic, global and ethical perspective they will consolidate a critical identity able to face several contexts.

Students will push their personal creativity through experimental visual research, new technology exploration and gives them the opportunity to map the link between technology and fine art designing a new horizon of reference.

Programme methods:

The programme is designed to facilitate the development of a student who will be highly employable and will allow them to investigate and develop their strengths.

The programme will present students with a variety of approaches to learning and assessment strategies that will promote intellectual, imaginative, analytical and critical judgement.

It will allow students to develop understanding as well as their presentation and communication skills, which they will be able to demonstrate in a variety of forms.

A combination of different learning and teaching methodologies are employed in order to promote reflective learning and develop generic transferable skills.

Methods include:

- projects to encourage independent learning through investigation, enquiry and problem solving;
- group project to enhance interpersonal and collaborative skills;
- tutorials and group tutorials to facilitate shared experiences and best practice;
- seminars, formal lectures and workshops;
- study, trips, external projects and competitions present the students with another dimension to their learning experience;
- guest speakers provide the students with a full, broader and real perspective to their specialist field of study.

Students will have the opportunity to demonstrate their achievement of the intended learning outcomes through a variety of tests appropriate to their field of study.

Course Specific Assessment Criteria:

The methods of assessment used give breadth and depth, which allow for both the formative and summative assessment of every student at each stage of the programme.

Assessment methods to support learning:

The programme uses a balanced assessment system, both summative and formative as an integral part of gathering information on student learning. Different forms of assessment can, and where appropriate should, be used to test different types of skills and learning.

Formative Assessment:

Formative assessment informs both teachers and students about student understanding at a point when timely adjustments can be made. In formative assessment students could be involved in the assessment process. These formative assessment situations will also give students an opportunity to learn to critique the work of others. Some of the instructional strategies that will be used formatively include the following:

- criteria and goal setting: asking students to participate in establishing what should be included in criteria for success;
- self and peer assessment: With peer evaluation, students see each other as resources for understanding and checking for quality work against previously established criteria;
- student record keeping: helps students better understand their own learning as evidenced by their classroom work. This process of students keeping ongoing records of their work not only engages students, it also helps them, beyond a "grade," to see where they started and the progress they are making toward the learning goal.

Summative Assessments:

These assessments are a means of gauging student learning, at a particular point in time, relative to established marking criteria.

Summative assessments > can occur during as well as at the end of each unit and concentrate on specific evidence of student work, examples as follows:

Portfolio Assessment > is used to assess a variety of projects that have been developed throughout the unit.

Practical Coursework > allows the students to demonstrate their understanding and application of practical areas of study.

Written Reports > are required in some study areas, where a clear and structured brief is provided and the students are asked to submit work to be marked independently and anonymously by staff.

Formal Examinations are required in some study areas

Presentations are used in some subjects to allow the student to develop their professional communication and presentation skills.

Student Projects are used when the student is required to submit work to be marked independently and anonymously.

5. Course structure

Code	Unit Title
S1	History of Contemporary Art
S1	Visual Communication Design Methodology
S1	Multimedia Languages
S1	Photography
S1	Visual Art Trends
S1	Techniques and Technologies for Visual Arts
S2	New Media Aesthetics
S2	Economy and Art Market
S2	Multimedia Installation
S2	Digital Modelling Techniques (3D)
S2	Contemporary Museology and Management of Exhibitions
S2	Sound Design

6. Personal Development Planning

PDP/Individual Development Tutorial.

The Director of Education and the Academic Service support the personal development of students. One-to-one appointments may be made by phone, through the receptionists or by email. Students can expect to be seen almost immediately to discuss any issues they may have.

7. Career service for one-year courses

Each school has its own dedicated Career Service Manager that heads the careers support team.

The purpose of the Career Service office is to support One Year Students with lectures, PowerPoint presentations and notes.

8. Course Specific Admission Requirements

Admission is based on the reasonable expectation that the student will be able to fulfil the objectives of the programme and achieve the standard required for the award.

Admission requirements are listed below.

Candidates must have a sufficient command of the English or the chosen language of the course to be able to meet the requirements of the programme in every respect.

When considering the suitability of an applicant for a place on the programme the Admissions team will usually take the following factors into account:

- the applicant's qualifications (High School Diploma or equivalent school certificate);
- the applicant's personal statement;
- a portfolio of work (if appropriate to the subject).

The Admissions Manager coordinates and supports the subject specific Programme Leader and the Director of Education in dealing with interviews and portfolio assessments (where appropriate).

(Admission requirements are subject to change in order to comply with entry requirement regulations).

9. Programme Leader Responsibilities

They will have responsibility for implementing the strategic direction of the courses within their programme and for co-ordinating the academic administration necessary for its successful day-to-day operation.

Programme Leader's Responsibilities:

- chairing the Programme Committee, and arranging for such meetings of the Committee as considered appropriate;
- acting as the Chief Executive Officer to the programme. As such he/she will be responsible, within the agreed policies of the Programme Committee, and Academic Boards, for the efficient operation of the programme as approved by the Institute;
- supporting and encouraging their teaching team including PDP;
- advise the Programme Committee on its proper responsibility for the continuing development of the programme;
- liaise on behalf of the Programme Committee with all staff as appropriate;
- be empowered to take on behalf of the Programme Committee any reasonable action with respect to the proper functioning of the programme;
- recommend areas for curriculum development;
- co-ordinate the assessment schedule for the Unit and ensure that it is communicated to students and the Director of Education;
- liaise with Student Support Officers to ensure that appropriate study support is available;
- recommend the appropriate level of resources required for the Unit and liaise with the teaching team;
- undertake training and professional development and contribute to the training of others;
- actively participate and organise Peer Support systems;
- monitor & respond to the student voice including regular meetings with the student Rep.;
- monitor Unit and course feedback and the student voice;
- organise all areas of assessment procedures, facilitate monitoring, joint marking, internal verification;
- maintaining the quality of academic standards by supporting the rules and regulations concerning exam procedures and conduct of the student and teaching team.

10. Student Support Strategy

Istituto Marangoni administers policies to enhance the student experience, in an academic, practical and pastoral way:

- Programme Leaders: the first point of call to acquaint students with regulations and issues arising on the programme;
- Student Support Officers for student referral where appropriate;
- programme and student handbooks;
- induction programmes for facilities including: Library, IT, online resources (where available) school facilities and media services;
- student group representatives (student voice).

Student Support Officers

A dedicated Student Support Officer is available for all students on the programme.

For academic counselling, Student Support Officers will liaise with tutors and programme leaders to offer practical advice to resolve specific academic difficulties.

A written record of these tutorials will be kept in the student's file for reference and to assist in the monitoring of student progress.

For matters of pastoral care the Student Support Officers will help in:

- finding their way around;
- managing their time;
- dealing with stress;
- getting the best from their course;
- understanding and applying the school's rules;
- anything else the officers can advise on.

One-to-one appointments may be made by phone, through the receptionists or by email. Where possible students can expect to be seen almost immediately, or contacted to arrange a suitable time.

11. Student Evaluation

Student feedback is essential to the programme development and student comments are used to enhance both the successful management of the programme and the teaching/learning strategies.

Istituto Marangoni gathers student opinion in a variety of ways, which may include the following:

- informal contact with Programme Leader and subject Tutor, and through appointments with academic staff;
- end of Unit Evaluation;
- end of academic year online questionnaires where students will be invited to reflect on their overall experience in their school. Issues will be taken to Programme Reflective Meetings and added to the Annual Academic Monitoring Report;
- Programme Committee.

Istituto Marangoni would prefer that on most occasions students be identified when giving constructive feedback on the course and teaching methods. There might be occasions when it is not appropriate and Istituto Marangoni recognizes this exception. In these instances, programme teams and central support services will ensure that anonymity and confidentiality is respected. In order to 'close the feedback loop' and to communicate any improvements resulting from student participation at least once every academic year, programme teams relate back to students the actions taken in response to student views.

Students will be asked to respond to a series of questions, for example, if they were clear about what they were meant to be learning on the unit, if the teaching had helped them learn effectively and if they have developed new or existing skills. The data will be analysed and the Programme Leader will be required to comment on:

- key strengths and issues arising from student performance;
- key strengths and issues arising from student feedback;
- actions and improvements for the next academic year.
