2. Why study this course, including course aims and objectives

Istituto Marangoni has more than 80 years' experience in training highly skilled future fashion professionals. During this time, we have built outstanding international networks within the fashion and design industries and have expanded to comprise 11 schools in 9 prime city locations, across 4 continents. We provide an outstanding, internationally recognised educational experience that responds to the evolving demands and requirements of tomorrow's industry professionals.

Our ethos as a school embraces the creative synergies that evolve constantly between the refined professionalism of the Italian luxury sector, and Parisian traditional craft, luxury and cultural scenes. and the nuanced global perspectives offered by our international student and tutor body. This is a distinctive characteristic that offers a unique environment in which our students can develop their individual creative identities and gain understanding of where their practice might be positioned in a rapidly evolving design and cultural landscape.

The MA Fashion and Luxury Brand Management provides in-depth knowledge of branding specifically for the fashion and luxury goods industries. Experts in luxury brand management know exactly where their products are positioned, fully understand their role in the market, and constantly analyse their relationships with customers. However, the task of the brand manager is not only to attract and retain consumers, but also to improve the practical and organisational management of a brand within the fashion organisation and this course addresses both areas; **luxury branding together with business management and organisation skills**.

You will learn how to adapt **communication, marketing and promotional techniques** to reach sales goals and fully apply the key strategies of luxury businesses. As well as concentrating on the intangible elements: customer relationships, the impact of digital and social media and the consumer 'experience', the programme presents a critical analysis of the more tangible elements of branding; product attributes (quality, features, and design), and the difference between **brand image and brand identity**, packaging and labelling. A successful luxury brand manager works on all of these aspects

The choice of fashion industry placement or professional project within the programme, gives you the opportunity to put theory into reflective and purposeful practice within the field of luxury. Participants become experts in making key branding decisions including in **brand extension and brand repositioning** and learn how to detect any weaker products in a collection. Analysis of the target audience and marketing mix provides a solid grounding for brand strategy development together with research on how companies in the fashion and luxury market develop their own interpretation of brand positioning and devise innovative strategies. The impact of **emerging technologies** has changed the face of communication and this course looks at finding the right balance between corporate brand image, new media and viral platforms – key to the success of luxury brands today.

Along with the study of past styles and cultures and the analysis of current trends and forecasts related to "future-fashion", participants are able to question how aesthetic expressions and interpretations of social and cultural trends influence positioning and brand image. Industry projects, guest speakers and the interdisciplinary learning environment enables students to pursue collaborations, live projects and assist to provide a detailed insight into the realities and the opportunities of luxury fashion.

This course is for participants who have previous undergraduate level study or proven work experience, completing the course with branding and management skills for various positions within the fashion, luxury and creative industries.

Istituto Marangoni works closely with employers and academic staff to promote and support work placement opportunities and communicate job vacancies for Istituto Marangoni students through recruitment days organised at the school for all postgraduate students

You may also work on live industry projects during the programme.

Assessment is planned to reflect the overall aims of the programme. is designed to monitor your performance regularly in the context of specific assessment requirements of individual subjects, through individual and team management skills required in business, the theoretical enquiry and applied skills necessary for effective use for business and ultimately the knowledge and skills essential to meet the overall requirements of your Masters degree

You are strongly encouraged to seek as much feedback as possible about your progress on your units from your lecturers. The Director of Education, with the support of the QA and HR teams, selects on a yearly basis the academic staff to whom professional development will be offered.

LTA programme

This programme provides participants with the opportunity to develop their practice through critical reflection and contextual debates informed by relevant theories and perspectives. Participants will consider their own teaching practice in the context of the wider HE landscape from both the teacher and learner perspectives. The assessment strategy for this programme requires an observation of practice, and participants will be expected to demonstrate that they can plan, deliver, evaluate and reflect on learning episodes using this process to inform planning for their CPD.

This programme is designed to offer participants maximum flexibility and the opportunity to personalise their own learning and practise through engagement with online learning resources. These resources will consist of key elements for the unit – e.g. principles of effective session planning, inclusive practice, assessment and curriculum design all linked to relevant learning and teaching theory. The unit focuses on the enhancement of the student experience and the development of critical reflective practice with a particular emphasis on observations of practice.

Throughout the programme participants consider how they can demonstrate the application of:

- underpinning theories and models of teaching and learning and reflective practice;
- methods to ensure inclusive teaching and learning strategies;
- techniques for session planning within constructively aligned teaching learning and assessment;

- models of reflective practice;
- theory applied to practice;
- quality measurement and enhancement mechanisms;
- engagement with the disciplinary and contextual drivers and strategies appropriate to their practice.
